4+ years • Full Stack • Distributed Systems • Robotics

PROFESSIONAL EXPERIENCE

Divergent Classes , <i>Software Engineer</i>	Delhi, India
Set technical strategy, system architecture, and product roadmap; drove prioritization and scope from customer discovery through live pilot deployments.	
Bramer Private Limited , <i>Co-founder & CTO</i>	Delhi, India
Set technical strategy, system architecture, and product roadmap; drove prioritization and scope from customer discovery through live pilot deployments.	

PROJECTS

Whisper <i>Rust</i>	crates.io/whisper github.com/beingglitch/whisper
TODO – Whisper bullets, not written yet.	
Augury <i>Python, Langchain, Langgraph, RAG</i>	augury.vercel.app github.com/beingglitch/augury
TODO – Whisper bullets, not written yet.	
Rix <i>Embedded Rust</i>	github.com/beingglitch/rix
TODO – Whisper bullets, not written yet.	
Lookup <i>Go</i>	github.com/beingglitch/lookup
TODO – Whisper bullets, not written yet.	
Levr <i>levr.js, TS, Langchain/Langgraph</i>	levr.vercel.app github.com/beingglitch/levr
TODO – Whisper bullets, not written yet.	
hermes <i>Rust, Anchor, Solana</i>	hermes.vercel.app github.com/beingglitch/hermes
TODO – Whisper bullets, not written yet.	
Nirmaan <i>Next.js 16, React 19, Prisma 7, PostgreSQL, Langchain, Langgraph</i>	nirmaan.vercel.app github.com/beingglitch/nirmaan
- Designed a dependency-graph computation engine where node values resolve through several bases with both top-down and bottom-up edges; a single topological pass diverges, so I implemented fixed-point iteration that converges any acyclic graph in under 30 passes. - Hardened the write path for connection-pooled PostgreSQL: idempotent recompute plus dirty-row diffing in concurrent batches removes long transactions, with copy-on-write versioning and per-node lineage powering cross-version diffs.	
fabric <i>Rust, Python, TypeScript, Mavlink, Tauri 2 (Desktop, Mobile, Web builds with CI/CD & Update pipeline), Github Actions</i>	app.bramer.in github.com/beingglitch/fabricos
Architected a single Rust hub-core compiled to three runtimes via Cargo feature flags: headless Axum server, Tauri 2 desktop, and Tauri 2 Android, with zero-port desktop embedding (a custom scheme handler pipes HTTP into the Axum router; Tauri events replace WebSockets).	

SKILLS

Languages: Python, Js/Ts, Rust, Go, SQL
Frontend: React, Next.js, React Native, TanStack, Zustand, Tauri 2, TailwindCSS
Backend: Node.js, FastAPI, Axum, Tokio, REST, WebSocket, WebRTC
Data: PostgreSQL, PostGIS, MongoDB, Cassandra, Redis, Firebase, Prisma, SQLite
Cloud and Infrastructure: AWS, GCP, Docker, Nginx, Github Actions
Blockchain: Anchor, Solana
Machine Learning and Robotics: ROS, Gazebo, PyTorch, OpenCV, LangGraph, LangChain

LEADERSHIP

I-Hub Foundation for Cobotics (IHFC), IIT Delhi , <i>Research Fellow</i>	
Selected for a competitive fellowship in collaborative robotics at IHFC, a Department of Science and Technology Innovation Hub at IIT Delhi; building a swarm-coordination system for multi-agent robotics.	
DTU IoT Lab , <i>Head of Development</i>	
Lead a team of student developers across the lab's drone and sensor-network research; own delivery on software-defined networking (SDN) and resilient mesh-relay workstreams.	
DTU Unmanned Aerial Systems (UAS) Team , <i>Software & Autonomy Lead</i>	
Led the software and autonomy sub-team; delivered the GPS-denied navigation stack (Robot Operating System 2, ROS 2), an early swarm-coordination framework, and the onboard visual perception pipeline for navigation.	

RESEARCH

- Neuromorphic SLAM:** chip-based module (under 5 W) using event-camera perception for real-time spatial mapping on micro-swarm drones in GPS-denied environments.
- Subsurface Ground-Penetrating Radar (GPR):** radar signal processing and machine-learning B-scan segmentation to reconstruct subsurface structures.

EDUCATION

Delhi Technological University (DTU) <i>B.Tech in Software Engineering</i>	2022 to 2026 <i>Delhi, India</i>
